

Report in details about Herbal Medicine

Data analysis report

Medicinal plants also called medicinal herbs have been discovered and used in traditional medicine practices since prehistoric times. The active ingredients made from Herbal medicinal plants are made from different parts of the plants such as leaf, roots and from the flowers. The medicines made from indigenous plants which are used to treat diseases or to maintain health are called herbal products. Students of Silapathar Science College collected some medicinal plants with its information from different areas of Assam which are used as medicine in different diseases traditionally. Our college takes initiative for collection and conservation of those herbal medicine plants collected from different areas of Dhemaji and Lakhimpur district of Assam.

The details analysis is given in the following table:

Sl. No.	Name practitioners	Address	Experience	Diseases	Plants used (with parts)	Any other materials used in preparation	Percentage of pureness	Preparation procedure	Dose given	Duration for taking dose	Precaution
1	Sanathi Basumatary	Simenchapari (Manikpur) P.O: Simenchapari Pin no: 787061 Ph no: 9678790988	25 to 30 years	Dysuriya disease	Siju (<i>Euphorbia nerifolia</i> L)	Tal-Mishery		Siju (Kernel) cutted into four parts. Cut it again into small pieces. Grind both of them well and keep them in water for some time and extract the juice.	One cup in a day (morning)	3 to 4 days	Skip onion, garlic, chilly and other spices
